

National Ethernet

The right choice for your organisation

In today's business environment it's imperative that people, applications and information within organisations are quickly and easily accessible. At the same time, moving large volumes of data between locations requires high speed transfer and seamless point-to-point or point-to-multipoint connectivity.

The increasing capacity to meet this demand can be expensive as bandwidth driven applications exceed the technology capability of ADSL and the commercial viability of leased lines.

Ethernet is different. It handles your expanding bandwidth needs efficiently and effectively and is considered the most viable, cost effective and technically capable solution for secure high speed connectivity.

LinchPin Networks knows how important your network is to your business. We partner with Tier 1 carriers who have credibility in delivering large bandwidth solutions nationally, enabling us to provide you not just with increased bandwidth, but with a complete serviceable solution.

You can benefit from

- greater operational efficiencies
- improved productivity
- increased cost savings
- an innovative and functional solution
- flexible and future-proof technology

Why miss out?

Fully supporting geographically dispersed sites, Linchpin Networks can provide the optimum solution for your organisation. We offer you the ability to increase effectiveness whilst reducing total net operating and ownership costs.

It provides a platform for you to:

- develop new business processes for collaborative working
- create more proactive business relationships
- enable your staff to really engage fully with your customers

Contact Linchpin Networks to discover how implementing an Ethernet solution can enable real time working between your staff, fast transmission of large files, and effective deployment of distributed applications throughout your organisation.

Product	Connectivity	Speed available
National Ethernet	Long distance point-to-point and point-to-multipoint Ethernet circuits	2Mbps up to 1Gbps in flexible increments
Ethernet Extensions	Point-to-point Ethernet circuits over the Metro Area	10Mbps, 100 Mbps and 1Gbps
Metro Ethernet Virtual Private Network (VPN)	Point-to-point, point-to-multipoint and any-to-any Ethernet over the Metro Area	2Mbps up to 1Gbps in flexible increments

Key Facts

- Short distance Ethernet connections are available at speeds of 10Mbps, 100Mbps or 1Gbps
- Short haul Metro Ethernet Solution connects inter-site LANs into a single, easily managed corporate network, with both point-to-point and hub-and-spoke topologies supported
- Enables effective real time working between your staff, fast transmission of large files and the deployment of distributed applications throughout your organisation
- Easier to deploy and manage than a traditional WAN infrastructure and more cost-effective than Leased Lines

About LinchPin Networks

LinchPin Networks Ltd was formed in 2004 to provide technical and sales consultancy to the Telecommunications Industry.

After much success in providing fibre solutions for customers' wide area networks, LinchPin Networks expanded its services to introduce further technical solutions to enhance your customers' experience: Wide Area (WAN), Dark Fibre, Application Acceleration, WAN Compression, WAN

Stress Tests, Dark Fibre, unlimited bandwidth WAN provision, MPLS based Ethernet WAN, Licensed Microwave provision.
